Average exit velocity by age - Baseball Made Fun

Exit velocity in baseball is the speed the ball is traveling after it hits and leaves a hitter's bat. It is not the same as bat speed. Bat speed is the speed of the bat as it is being swung. Bat speed will typically be slower than the exit velocity of the ball itself, but they do have a correlated relationship.

What is Exit Velocity and How Do You Measure It ...

The Exit Speed Developer is a revolutionary swing training aid that rethinks how baseball players build strength and hitting power. Advancing the traditional donut weight, Mach 1, Mach 2 and Mach 3 utilize a durable terry cloth parachute sized to suit your training level that creates drag throughout the extension and finish of the swing, providing complete resistance for the duration of the swing.
