The simplest algorithm in the PID family is a proportional or P-Only controller. Like all automatic controllers, it repeats a measurement-computation-action procedure at every loop sample time, T, following the logic flow shown in the block diagram below (click for large view):Starting at the far right of the control loop block diagram above:

The manual should've stated that to set proper expectations because people would think it's not working at all. Overall however, it's still a good unit, and we already saw a decrease in our electricity bill of about 1k pesos. And a 10-year compressor warranty is nothing to scoff at. Definitely a good buy. We hope it lasts.

My own PKZIP-compatible compressor focusing on space over speed. KZIP creates smaller .ZIP files than PKZIP with maximum compression enabled and even beats 7-Zip most of the time. I use a few tricks beyond what your typical compressor will do. The main one is an exhaustive search of all patterns. The other one is my advanced block splitter.
