We have just introduced certain upgrades and changes which should be interesting for you. Please remember that our website does not replace publisher websites, there would be no point in duplicating the information. Our idea is to present you with tools that might be useful in your work with individual, institutional and corporate customers. Many of the features have been introduced at specific requests from some of you. Others are still at preparatory stage and will be implemented soon.

Maternal Fetal And Obstetric Evidence

Abstract: In 2011, one in three women who gave birth in the United States did so by cesarean delivery. Cesarean birth can be life-saving for the fetus, the mother, or both in certain cases. However, the rapid increase in cesarean birth rates from 1996 to 2011 without clear evidence of concomitant decreases in maternal or neonatal morbidity or mortality raises significant concern that cesarean ...

According to the in utero fetal programming hypothesis (Barker hypothesis), size at birth is related to the risk of developing disease later in life. 4 Although the Barker hypothesis originally focused on low birth weight, there is evidence that high birth weight may have its own set of complications later in life. A link between maternal obesity in the first trimester and obesity in children ...

The Impact of Maternal Obesity on Maternal and Fetal Health

ABSTRACT: Maternal mortality and severe maternal morbidity, particularly among women of color, have increased in the United States. The leading medical causes of maternal mortality include cardiovascular disease, infection, and common obstetric complications such as hemorrhage, and vary by timing relative to the end of pregnancy.

Maternal stress is suggested to increase the risk of the offspring developing cardiovascular, metabolic or neuropsychiatric disorders. These lifelong consequences summarize a concept that is known as fetal programming. Many studies have shown that fetal programming has its origins in the over-production of the stress hormone, cortisol.
