The web page structure should be familiar if you've worked with web applications in the past. We start with a plain HTML5 + JavaScript application that has a DIV tag for the map display. We include the PubNub library for realtime communications in the HEAD of the HTML page.

Realtime Google Maps Geolocation Tracking with JavaScript ...

I'll demo this concept by building a small app that sends a notification whenever someone pushes code to a GitHub repository. Realtime notifications are a feature of many modern web applications. When utilized properly, they can be a great way to inform users about new activity in your web app so that they don't miss it. Prerequisites

Use the HTML5 Notification API to provide realtime alerts

In the book Realtime Web Apps with HTML5 WebSockets, PHP and jQuery, Jason Lengstorf and I step through the process of building a realtime application on the LAMP stack, from concept and design through development.
