If the refrigerator doors are not opened, it can take up to 4 hours for the display to change to the temperature you have set and up to 28 hours for the refrigerator to achieve that temperature. The steps for changing your refrigerator's temperature will depend on the model you own.

What temperature should I set my Samsung refrigerator to?

A refrigerator leaking water outside can be due to excessive humidity. On hot and humid days, moisture in the air can add to the water already in the refrigerator and cause leaks. When your Samsung refrigerator is leaking from the bottom, it's because this moisture accumulates in the drain pan and overflows onto the floor.
