A watchmaker is an artisan who makes and repairs watches.Since a majority of watches are now factory-made, most modern watchmakers only repair watches. However, originally they were master craftsmen who built watches, including all their parts, by hand. Modern watchmakers, when required to repair older watches, for which replacement parts may not be available, must have fabrication skills, and ...

Shown below is a brand new Bergeon 4657 that replaced a fairly well worn generic rubber air bulb. It was down graded for use around the lathe where clearing metal chips out of tight corners and holes is a regular need. Using it around the lathe also gets the air bulb quite dirty and decided a separate one dedicated to the assembly bench was in ...
